

# Case Study 2

Client:

**De Soutter Medical**

Industry/Sector:

**Medical/Surgical**

Project:

**Various components for surgical power tools**

CERTIFICATE No. 12184

De Soutter Medical is a leading manufacturer of surgical power tools that are distributed worldwide and RST has worked on a number of components including spark eroding small internal gears to a high tolerance, the manufacture of sagittal saw blades and drive shafts, bearing housing and friction jaws.

In order to produce advanced power instrument solutions for today's exacting bone cutting surgical procedures, each tool must be precise, reliable and meet rigorous international quality requirements.

We are proud that as a result of our proactive approach and expert consultation, RST's recommendations for manufacturing improvements were taken up by De Soutter Medical in its production of blade retainers.

***We can always rely on RST for a fantastic combination of great quality and speedy delivery."***
