

Case Study 3

Client:

F1 Race Team*

Industry/Sector:

Automotive/Motor Sport

Project:

Components and tooling for F1 car

CERTIFICATE No. 12184

RST has worked on various components and tooling for F1 Teams. In motor sports, where every decision is focused on gaining a competitive edge, investment in advanced technological developments and continual performance testing contributes to success on the track.

"Our fast moving business constantly requires high performance components and I would not hesitate in recommending RST to other buyers for their quality and timely delivery."

*Technical Buyer
(Gearbox & Hydraulics),
F1 Race Team*

* (Client identity withheld in accordance with confidentiality agreement)

We share the client's relentless attention to detail and have been able to quickly turn around commissions that aim to enhance the quality of F1 cars and improve their chances of winning on the racing circuit.

Our challenge has been to deliver exceptionally tight tolerance components with multiple operations to very short timescales. We succeeded on time, for a competitive price, without compromising our dedication to the highest quality and professional, personal service, with *precision as standard*.
